

Postdoctoral position in sex chromosome evolution/evolutionary genomics

The Campbell lab (<https://www.campbelllab.net/>) in the Department of Evolution, Ecology, and Organismal Biology at the University of California Riverside (<https://eeob.ucr.edu/>) is seeking a postdoctoral researcher to work on sex chromosome evolution in a non-model rodent system. The system is novel, tractable and (we think!) fascinating. You will contribute to a large transcriptome study testing for signatures of sexual antagonism and will have freedom to develop this, or additional projects, along your particular lines of interest. There will be opportunities for fieldwork in California and the Pacific Northwest.

Qualifications: You must have completed a PhD (or will have one before the position starts) in evolutionary biology, population genetics, genomics, or a related area. Expertise in a programming language (e.g. R, python) and experience working with transcriptomic and/or genomic data are highly desirable and will accelerate your publication rate.

Start date is flexible up to Fall 2022. Funding is available for two years. Minimum salary is \$54,540 (zero years postdoc experience).

Review of applications will begin immediately and will continue until the position is filled. To apply, please send a pdf with a letter of interest, CV, and contact information for three references to polly.campbell@ucr.edu. Informal inquiries are also welcome.

The University of California is an Equal Opportunity/Affirmative Action Employer with a strong institutional commitment to the achievement of excellence and diversity among its faculty and staff. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability, protected veteran status, or any other characteristic protected by law. UCR is a world-class research university with an exceptionally diverse undergraduate student body. Its mission is explicitly linked to providing routes to educational success for underrepresented and first-generation college students.

University of California COVID-19 Vaccination Program Policy

As a condition of employment, you will be required to comply with the University of California SARS-CoV-2 (COVID-19) Vaccination Program Policy. All Covered Individuals under the policy must provide proof of Full Vaccination or, if applicable, submit a request for Exception (based on Medical Exemption, Disability, and/or Religious Objection) or Deferral (based on pregnancy) no later than the applicable deadline. For new University of California employees, the applicable deadline is eight weeks after their first date of employment.
